

Victoria Road restriping project

ASHEVILLE - In an effort to improve traffic flow along Victoria Road in the vicinity of Asheville High School, the City of Asheville is upgrading the existing two-lane cross-section to a three-lane cross-section between Livingston Street and the Asheville High School access point.

This change will provide a through lane in each direction and a center lane for left turns.

The work should be completed the week of Nov. 1, weather permitting.

This project evolved through collaboration between the City of Asheville's Transportation Department, Asheville City Schools, the Asheville City Schools Central Office, Asheville-Buncombe Technical Community College, Mission Hospitals, the Asheville Police Department and the School of Inquiry and Life Sciences at Asheville.
